Additional Cases of COVID-19 Identified

St. Joseph County- Two additional individuals in St. Joseph County have tested positive for SARS-CoV-2, the virus that causes COVID-19 infection, bringing the county’s total number of confirmed cases to now 5. Neither of these individuals has required hospitalization, and both are recovering. Both have exposure history to a known COVID-19 case and have been observing self-isolation as instructed, reducing the overall risk to the broader community.

The St. Joseph County Department of Health continues to advise that individuals who have been tested for SARS-CoV-2 (novel coronavirus) remain in self-isolation until test results are back AND they are no longer experiencing any symptoms.

For more information on COVID-19, visit www.cdc.gov and for general questions as it relates to COVID-19 infection, please call 2-1-1.
